What customers say about APC products...

Reliable

Delivers positive ROI and best-in-class performance

Intuitive

Sustainable, compact, and flexible design

Dedicated, expert technical support

Our history of innovation:

1980s

Revolutionizes UPS management via graceful network shutdown

1990s

Introduces the first user-replaceable batteries, intelligent battery management, and pioneers the first web-manageable UPS

2000s

Efficiency takes center stage and APC's UPS is the first to receive ENERGY STAR qualification

2010s

First to introduce UPS with lithium-ion battery

lithium

2020s

First to integrate wide bandgap semiconductor technology into single phase UPS, making the smallest, lightest UPS of its kind

When investing in **APC-branded** technology, you can count on:
