

Eventide Recording for Motorola Solutions' MOTOTRBO Controllerless Systems

Solution Overview:

NexLog DX-Series recording solutions (and original NexLog recorders) provide reliable IP-based call recording for MOTOTRBO controller-less systems. Recordings are instantly available for instant recall, replay, incident reconstruction and export. The same recording solution can also record telephones, analog radio and PC screens.

MOTOTRBO Topologies Supported:

- Capacity Plus Multi-Site (formerly Linked Capacity Plus)
- Capacity Plus Single-Site (formerly Capacity Plus)
- IP Site Connect

Audio Capture Method:

- IP recording via network connectivity to compatible repeaters with NAI-Voice licensing

MOTOTRBO Repeaters Supported:

- XPR8380, XPR8400, SLR1000, SLR5700, MTR3000, SLR8000

Metadata captured:

- Source ID
- Called Radio ID or Group ID
- Call Type (PRIVATE, GROUP, EMERGENCY, etc.)
- Site ID (for Linked Capacity Plus)

About Eventide:

Eventide is a Motorola-licensed Applications Development Partner for the North America, EMEA and APAC regions. Eventide recording systems offer advanced connectivity, exceptional incident management tools, and outstanding Linux-based system reliability. Features and capabilities are subject to change. Check with Eventide Inc. for current information and availability.
